

## **SENKO Advanced Components, Inc.**

March 16, 2020

Dear Valued Customer-

Our commitment at the beginning of the Covid-19 outbreak was to keep you informed and up to date of changes as they occurred within Senko Advanced Components, Inc.

To that end, we want to first reassure all of our Customers that since the onset of this global situation thankfully we have had minimal, if any, interruptions in maintaining our Product stock levels or the continued manufacture of the vast majority of our interconnect component products.

Our top priority is the health and well - being of our employees and families, customers, and the general public. Adhering recommendations from multiple public health agencies, we have eliminated all non - essential travel and implemented policies across our facilities to minimize the potential for virus transmission.

As the situation is changing daily in the various areas of the globe, Senko Management has further decided it will scale down physical presence in our offices while keeping our operations running as smoothly as possible. With current technology, we believe there should be no disruptions of our business and your needs.

We will continue to monitor and adjust our policies and responses to the global pandemic as necessary to protect our most valuable asset, our employees, while continuing to provide the best possible service to our customers. We also know and acknowledge that you are facing similar challenges and want to assure you that we are making every effort to maintain our strong and reliable business relationship.

Thank you for your business and understanding during these times of uncertainty.

Best regards,

Kazu Takano  
President
