

LC-HD | HIGH DENSITY CONNECTOR

The SENKO LC-HD, is a totally unique design which can increase panel density to its highest possible

Easy to release trigger connector

The Senko LC-HD's lever design utilizes a flexible "pull-tab" allowing for the connector to be disengaged easily from densely loaded panels without the need for special tools.

"Pull-Tabs" are available in three standard lengths and multiple colors.

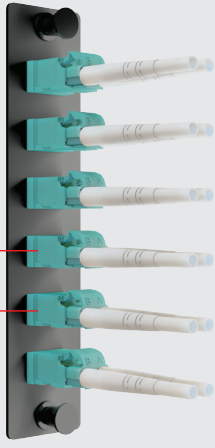

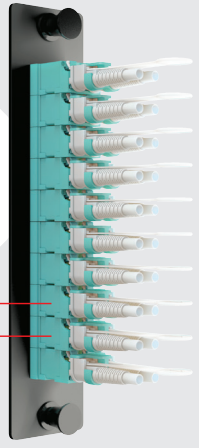

Stackable adapters

In the days before the Senko LC-HD connector, the LC adaptor spacing was limited by the room required to reach LC connectors with the human fingers or with special tools. The overall height of standard LC connectors also required a small vertical space above and below the LC adapters. The low profile Senko LC-HD, together with its pull tab allow LC adapters to be stacked with absolutely no vertical space.

60% increase in density

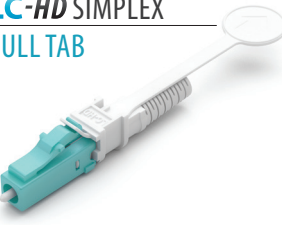

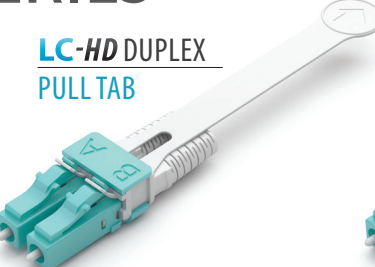

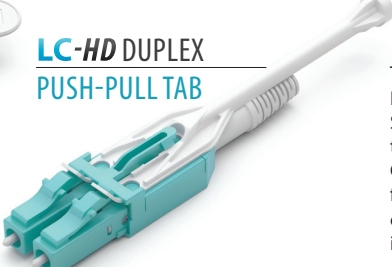

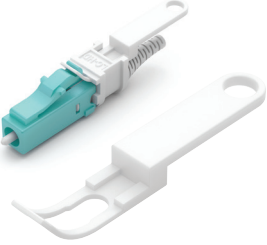

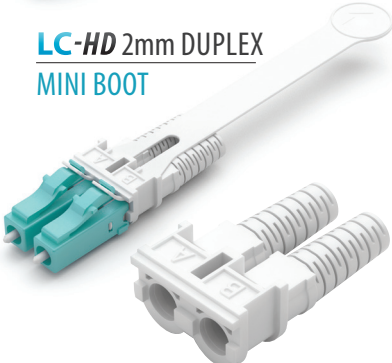

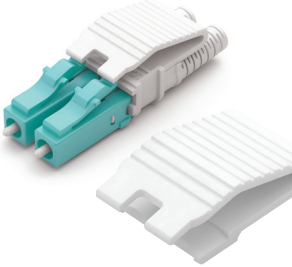

Because the Senko LC-HD connector can be removed using a simple pull tab, it eliminates the need for finger access to the LC connectors latch mechanism, therefore LC adapters can now be mounted much closer than spacing required in the past.

CONVENTIONAL RACK	HIGH DENSITY RACK
<p>6 PACK SPACING</p>  <p>17.4 mm (0.69 in)</p>	<p>10 PACK LC-HD SPACING</p> <p>60% increase in density</p>  <p>9.4 mm (0.37 in)</p>
	<p>Push-Pull Tab is rigid and allows for connector insertion as well as disconnect</p> 
	<p>Pull Tab available on all HD Series Connectors allows for labeling</p> 

LC-HD | SERIES

The LC-HD SERIES is RoHS, Reach SVHC and UL 94 V-0 compliant.

<p>LC-HD SIMPLEX PULL TAB</p> 	<p>LC-HD DUPLEX PULL TAB</p> 	<p>LC-HD DUPLEX PUSH-PULL TAB</p> 	<p>The LC-HD duplex Push-Pull Tab is a Push -Pull Tab designed for the LC-HD Switchable Connector. This Push-Pull tab option allows the LC-HD Switchable Connector to be pushed and pulled from the Push Pull Tab instead of the connector, maximizing its effectiveness in high density applications.</p>
<p>LC-HD 900µM MINI BOOT</p> 	<p>LC-HD BTW PUSH-PULL TAB</p> 	<p>LC-HD 2mm DUPLEX MINI BOOT</p> 	<p>LC-HD DUPLEX FINGER CLIP</p> 
<p>The LC-HD 900um Mini Boot is a 900um boot designed for BTW (Behind the Wall) applications. It is part of the LD-HD series, made specifically for high density applications.</p>	<p>The LC-HD BTW Push-Pull Tab is a pull tab option designed for the LC-HD Connector with 900um MINI BOOT for BTW (Behind The Wall) applications.</p>	<p>The LC-HD 2mm DUPLEX Mini Boot eliminates the need of the Duplex clip, simplifies the assembly process while makes the connector stronger.</p>	<p>The LC-HD Duplex Finger Clip allows the LC-HD Duplex Connectors to be removed using a latch option, instead of a pull tab option.</p>
